Mr. Joe Duksa  
D & D Enterprises  
40025 Baker Drive  
Steamboat Springs  
Colorado, 80487

Subject: Revised soil evaluation for an Onsite Wastewater Treatment System (OWTS) for an existing office facility at the above address.

Dear Mr. Duksa,

The purpose of this letter is to inform you and certify that, per our observations, the construction of the OWTS at your subject property has now been completed in substantial conformance with our design for it.

The as built dimensions of the system are precisely as was depicted on our design drawing for the system, so both you and the cognizant authority may treat the final revision of our original design drawing for the system as an 'as-built' drawing of the system.

Thank you for the opportunity to have been of professional service to you in this matter.

Sincerely,  
Bear Valley Design, Ltd.

  
Gregory H. Hermann
