**Re:** AT&T Application for Upgrade of Project 14758496 - Wireless Facility  
**Site Address:** 30700 County Road 14B, Steamboat Springs, CO 80487

Notice of 60 Day Eligible Facilities Request Application

Dear Building Department,

We write to you on behalf of AT&T Wireless with respect to the above-referenced Eligible Facilities Request (“EFR”) permit application submitted with this letter (the “Application”). The Application proposes an upgrade to an existing wireless facility that meets the criteria for an EFR under 47 U.S.C. § 1455 (the “Spectrum Act”). Further, review and approval of the Application must be conducted administratively in accordance with Federal Communications Commission (“FCC”) order adopted October 18, 2014 (the “Spectrum Act Order”), codified as 47 C.F.R. §1.40001, and completed within 60 days of submittal in accordance with 47 C.F.R. §1.40001(c)(2).

Under 47 C.F.R. §1.40001, the review of the Application by Routt County, CO is limited to determining whether it is an eligible facilities request that does not substantially change the physical dimensions of the [Base Station or Tower]. As you will see, the Application details the necessary criteria for a modification to constitute an EFR and describes how this specific modification project meets the EFR requirements.

You may contact me at 205-443-3426 with any questions you may have about this project or the EFR process. We look forward to working with you on this and other future wireless projects.

Regards,

*Katherine Gattman*
