Notice of Non-Public Water System

Dear RAYNA LEE:

According to the Colorado Department of Public Health and Environment ("Department") records, **INDIAN ROCK RANCH BED AND BREAKFAST ("Supplier")** does not meet the definition of a public water system. A public water system is defined as:

- A system that provides the public water for human consumption through pipes or other constructed conveyances;
- Has at least fifteen service connections; and/or
- Regularly serves an average of at least 25 individuals daily at least 60 days per year; and
- Includes either a source or treatment, or receives all of its water from a public water system and sells water to its customers.

Please note that the definition of a public water system is self-implementing. It is the responsibility of the Supplier to assess on a regular basis whether their water system is a public water system. If the Supplier ever meets the definition of a public water system, the Department must be notified, and the Supplier must immediately comply with the applicable requirements in the Colorado Primary Drinking Water Regulations, Regulation No. 11, 5 CCR 1002-11 ("Regulation 11").

Please be advised, if the Supplier is supplying water to the public as part of its operation (such as a restaurant, child care, or school), alternate regulations for water may apply. For more information on regulations pertaining to those operations please contact your local health department. Additionally, mobile home parks that supply water are subject to the Mobile Home Park Water Quality Act (HB23-1257) that is administered by the Department.

If there are any questions regarding the contents of this letter and/or requirements for the Supplier, please contact your compliance specialist:
