Hi Alan,

I don't have time to write a formal letter before next week, but I wanted to let you know that the Colorado Geological Survey has no objection to approval of the Tailwaters at Stagecoach subdivision, PL20240006. I don't see evidence of slope instability or other geologic hazards, and the characterization of subsurface conditions and recommendations in Western Slope Geotech's Geotechnical Exploration and Geologic Hazard Evaluation, Proposed Tailwaters at Stagecoach Subdivision, Routt County, Colorado (Project No. 23-1076, October 27, 2023) are valid.

Please call or email if you have questions or need further review.

Thanks,
Jill Carlson
