Hi Joe,

Scrap metal recycling is actually exempt from the recycling regulations in Colorado. However, we are always looking for more information to include in our annual recycling report. There are a number of facilities that voluntarily report annual recycling numbers to us, so that we have a more complete picture of what is actually being recycled in Colorado. Voluntary reports are always maintained as confidential. If that is something you would be willing to do, I would greatly appreciate it. If you are, just let me know, and I'll add you to my email reminder list for annual reports.

Thanks,
Jace
