

Sanders Gravel Pit

Exhibit 6(d): Phase 2 Reclamation Plan Map*

Boundary of Subject Property on west and south sides of Extraction Site (blue line)

Upper Pit

Slope of 1-2% away from Road towards center of Pit and then SW to sediment pond

Potential Building/Equipment Storage Site

Existing Private Access Road (approx. 1620 feet from Extraction Site to CR 129, approx. 12 feet wide)

Sediment pond (approx. size/volume?)

Extraction Site (full extent, inclusive of Phase 1) (red line)

3:1 slopes
~150' horizontal width; 175'-200' slope length from highwall to toe

Swale at toe of slope

Reclamation of Phase 2:

- 3H:1V slopes will be topsoiled and revegetated.
- The gentle swale at toe of 3:1 slope will transport drainage from pasture to Sediment Pond in SW corner of reclaimed Extraction Site.
- The Upper Pit will be regraded, topsoiled, and revegetated. Upper Pit floor will slope to SW at 2% grade.
- The Potential Building/Equipment Storage Site will be leveled and covered with gravel surface.

Sloping to SW at 2% grade
