Adam,

Thank you for the information and for reaching out to CPW. Based on the current development and the scope of the proposed project, I do not anticipate any negative impacts to local wildlife. I would however recommend that during the construction phase in particular, utilizing Interagency Grizzly Bear Committee (IGBC) certified refuse containers/dumpsters as black bears are certainly active in that area between March/April and November/December. Feel free to reach out if you have any further concerns or questions, thank you.

Hi Kyle,

Thanks for your time this morning. Please see attached site plan showing the existing home and the proposed building envelope change. I've also attached the complete survey.

Let me know if there is anything further you need at this time.

I appreciate the help.

Best,

Adam
