RE: COG591184 Phippsburg WWTP Site Application RFI Responses

Dear Ms. Wong,

We received the Request for Information letter dated December 5, 2022, related to your review of the Site Application prepared by AquaWorks DBO. The following is our response:

**1) Discuss the strategy to address meeting the arsenic limit.**

The discharge permit contains a 0.02 ug/L arsenic limit that becomes effective January 1, 2028. Our understanding is that all surface water discharge permits will have the same limit. Routt County intends to use the compliance period between now and 2028 to work with the Division to find and implement a solution for meeting the limit.

Please feel free to contact me directly at (303) 477-5915 with any questions.

Sincerely,

AQUAWORKS DBO, INC.

Adam Sommers, P.E.  
cc. Routt County
